

Omar Pelcastre-Cabrera

Financial Analyst skilled in Python, data visualization, and financial modeling, with experience delivering insights through real-world analytics projects. Currently transitioning from Professional Photography to a professional career in Finance and Business Intelligence. With strong skills in data management and team collaboration, I would be honored to be a part of the Finance team at Eastern Municipal Water District.

Education

California State Polytechnic University - Pomona - Pomona, CA

Bachelor of Science in Business Administration - 2020

- USF Business Analytics Hackathon 2019 - 2nd Place (SF Crime Data Dashboard)

Experience

Equity & Fixed Income Analyst Intern | Cal Poly Pomona SMIF June 2019 - January 2021

- Developed Excel-based financial models to analyze portfolio performance, assess sector weightings, and simulate allocation scenarios under varying market conditions.
- Conducted monthly variance analysis and performance reporting across Real Estate, Financials, and Utilities sectors, informing portfolio rebalancing decisions.
- Automated fixed-income risk tracking using Python, improving speed and accuracy of duration and yield curve assessments.

School Photographer Contractor | Sunset School Portraits April 2021 - Present

- Photographed 200+ students per day under tight timelines, configuring on-site ID-card printers for immediate reprints
- Leveraged Excel to track student attendance and missing sessions

Owner and Photography Lead | Omar Pelcastre Photography August 2013 - Present

- Coordinated 12+ hour shoots with bridal shops, event planners and assistants to capture every moment.
- Built and maintained custom online galleries for hundreds of clients to view, share, and download proofs.
- Managed all client communications, contracts, billing and post-production delivery.

Skills

Data Analytic Tools

Python, Tableau, Excel/ VBA, Google Sheets, SQL

Statistical Methods & Finance Concepts

Descriptive Statistics, Time-Series Analysis, Regression Analysis, Financial Modeling, Portfolio Optimization, Risk Management

DevOps & Collaboration

Visual Studio, Git & Github, Google Collab, Jupyter Notebook

Certifications

Power BI Data Modeling & Visualization

Python for Financial Analysis

SQL Programming Basics

Projects

SF Crime Data Dashboard

Interactive Tableau visualization showing crime patterns in SF— filter by category, time, and neighborhood. Geographic analysis includes heatmaps and clustering to identify crime hotspots.

Portfolio Optimization

Python-based mean-variance optimizer that pulls historical price data, computes efficient frontiers, and outputs interactive charts in Jupyter Notebook. Optimization methods include Martowitz and Min Variance.

CFAI-OC IRC Report

Collaborated on a CFA Institute Research Challenge equity report on Alteryx, developing financial models and issuing a valuation-backed HOLD recommendation presented to a panel of industry professionals.
